To: Memo to the Files

Date: November 29, 1976

From: R. N. Thomson

Subject: Toxic Substances Information Act

Dr. John A. Hilcken of the State Department of Health called today to confirm the fact that he had received our request for an exemption from the requirements of the Toxic Substances Information Act. He said they had received similar requests from a dozen other laboratories and were forming a subcommittee to take notice and comment on these exemptions. There were some indications from his comments that they plan to publicize in newspapers or other media the laboratories requesting exemption. He said he would send us official notice and the comments they have to date. He inferred that the subcommittee meeting would be somewhere around December 14 and he didn't believe it would constitute a public meeting at this time. I expect more explanatory information in writing.

Dr. Hilcken asked whether it would be possible to tour our facilities at sometime in the future to see what type of research operations we have. I assured him that this would be possible.
